

Dr. Ricardo Hernandez:

1984-1990 graduate in Chemistry, macromolecules speciality. He started his research thesis in 1992 and defended it in 2009. He has been lecturer in the Polymer Engineering degree run in franchise with the London Metropolitan University since 1996 until the discontinuation of the grade in 2016. He has been the link with the University and head of University studies in Lea Artibai from 2001 to 2012. His interests are related with the knowledge of polymer materials, rheology, thermal characterisation, chemical analysis and mechanical testing of polymeric materials. He is member of Leartiker since its constitution and is involved in the New Materials research unit.

Main research fields: thermoplastic, lightweight, TPE and rubber compounding and processing.

National and international research projects: More than 25 local and national research projects.

Publications include 6 international scientific papers and 19 contributions to scientific conferences.
